

What is Dovetail?

Dovetail is a service that provides clinical advice and professional support to workers, services and communities across Queensland who engage with young people affected by alcohol and other drug (AOD) use. Dovetail is part of Insight, the centre for alcohol and other drug training and workforce development in Queensland.

Our aim is to build sector capacity by:

- Identifying workers who engage with young people who are using alcohol and drugs in Queensland
- Connecting services and workers together, and
- Equipping them with knowledge, skills, tools and resources to enhance their practice

These strategies seek to prevent the harms experienced by, and improve treatment outcomes for, young people affected by alcohol and drug use across the State.

Our Services

Training

Free training delivered across Queensland including in rural and remote locations.

- Full day in-person workshops
- Shorter in-person or virtual sessions tailored to respond to youth AOD issues relevant for the community
