Ways you can better support patients experiencing opioid use disorder

I want to better manage my existing patients who may be opioid dependent	**I want to become a specialist opioid dependence treatment prescriber**	**I'm not sure...** How else can I support my patients?

We recommend becoming a:
Level 2 'Buprenorphine-only' QOTP Prescriber

We recommend becoming a:
Level 1 'Full' QOTP Prescriber (buprenorphine & methadone)

We recommend meeting with your local Queensland Health AOD Service to:

- get a better understanding of what they provide and how to best support your patients
- discuss referral pathways
- investigate shadowing and/or supervision opportunities
- find out if Shared Care arrangements are available in your area.

To find out your local Queensland Health AOD Service visit the link below -
adis.health.qld.gov.au/getting-support/find-a-service

STEP 1
Visit the 'QOTP Toolkit' on the Insight website and complete eLearning Modules 1 and 2 only
insight.qld.edu.au/toolkits/qotp/detail

STEP 1
Visit the 'QOTP Toolkit' on the Insight website and complete eLearning Modules 1, 2 and 3
insight.qld.edu.au/toolkits/qotp/detail

STEP 2
Submit application form to Qld Health's Medicines and Regulation Unit (MARU) confirming completion of the 2 eLearning modules and await confirmation letter of Level 2 authorisation

STEP 2
Undertake a brief clinical placement with an existing Level 1 Full QOTP prescriber (in-person or virtual)

STEP 3
Submit application form to Qld Health's Medicines and Regulation Unit (MARU) confirming completion of all 3 eLearning modules and completed clinical placement and await confirmation letter of Full Level 1 authorisation

Commence prescribing approved ODT medications with your patients
